Chapter 1. Installing the agl-base Roll

1.1. Adding the Roll

The agl-base Roll must be installed during the Frontend installation step of your cluster (refer to section 1.2 of the Rocks usersguide). Future releases will allow the installation of the agl-base Roll onto a running system.

The agl-base Roll is added to a Frontend installation in exactly the same manner as the required HPC Roll. Specifically, after the HPC Roll is added the installer will once again ask if you have a Roll (see below). Select 'Yes' and insert the agl-base Roll.

Chapter 2. Using the agl-base Roll

2.1. Using the agl-base Roll

Tutorials for using agl-base and its components are available from the agl-base web site[1]
