Chapter 1. Installing the agl-osg3 Roll

1.1. Adding the Roll

The agl-osg3 Roll must be installed during the Frontend installation step of your cluster (refer to section 1.2 of the Rocks usersguide). Future releases will allow the installation of the agl-osg3 Roll onto a running system.

The agl-osg3 Roll is added to a Frontend installation in exactly the same manner as the required HPC Roll. Specifically, after the HPC Roll is added the installer will once again ask if you have a Roll (see below). Select 'Yes' and insert the agl-osg3 Roll.

Chapter 2. Using the agl-osg3 Roll

2.1. Using the agl-osg3 Roll

Tutorials for using agl-osg3 and its components are available from the agl-osg3 web site¹
